What We Did

Why You Care

All residential hot water produced by efficient centralized natural gas boiler

Generates hot water using less energy. You'll never run out of hot water again!

Operable Low-E windows and extra wall, floor and ceiling insulation

Stay warmer in the winter, cooler in the summer and pay less on your electricity bills

Drought resistant landscaping and drip irrigation

Reduces landscape water consumption and reduces the pass-through cost to you

Floor to ceiling windows give great natural light

Natural sunlight and great views are good for your spirit and turning on fewer lights is good for the planet

Over 90% of construction waste recycled

Less garbage going to the landfill, less mess for us all

Low VOC paints, carpets and adhesives used

Improved indoor air quality and fewer household toxins to worry about

Mural is 100% Smoke free

No second hand smoke and no annoying cigarette smell

First residential Zipcar hub in West Seattle & property located adjacent to new bus RapidRide service

Leave your car at home or say goodbye to your car for good! Save money and time with frequent rapid bus service to downtown. Need to use a car for a bit? We have West Seattle's first residential Zipcar hub

Electric vehicle charging stations and preferred parking

The future is here and it's electric! If you're an electric vehicle early adopter we got you covered with charging stations in a great location in our garage

Free bike storage lockers and guest bike parking at our artistic bike rack

Stay healthy, save money and keep the planet cool! Spacious, secure and free storage lockers for your bike and secure bike parking for your visitors

Mural is built on an urban infill site and is a redevelopment of a "greyfield" parking lot

Parking lots cause pollution runoff, and suburban sprawl causes more parking lots. You can feel good about eliminating both!

Mural is a Built Green certified development

We think Mural is pretty green, but you don't need to take our word for it because Mural is certified through the regionally recognized Built Green program
